# only by Boat 854 CRUISE Blue Grotto

Yagoshi cruise experience

As the cruise ship is fast, you can enjoy the thrill of the rocking waves and the blowing wind. You'll soon lose track of time while you ride.

While heading to the blue cave, you will visit various places while being surrounded by pleasant music. There you can see the beautiful landscape of nature. As if you were watching a movie, please take time to observe your surroundings.

Drop a white stone in the Blue Grotto to make your wish come true!

If you drop a white stone in the Blue Grotto your wish might come true!

## We have many other famous things

Only in Southern Hokkaido  
**Marbled Sole**

Mable Sole have scales between both eyes. It is distinct for having no black pattern on its dorsal and anal fins. In Hokkaido, fishing grounds are limited to Kikonai bay and Hakodate bay, and can be fished all year round. While Mabled Sole is fat in summer and thin in winter, those containing roe are said to be the most delicious. Feel free to try and catch some in Shiriuchi.

This is mabled Sole. It's delicious if you make it into sushi. Please try catching one and eating it as sushi! For sure please try it, it's really good!

**Yakushiyu (Cold Spring)**

The spring is very cold. Also, though it smells of boiled eggs, it makes one's skin shine. Perfect for women.

Near Kotaniishi's bus stand, you can find Yakushidou's spring. In the cold mineral spring, there are white floating minerals. It is said to speed up healing if you drink the water or apply it to injuries.

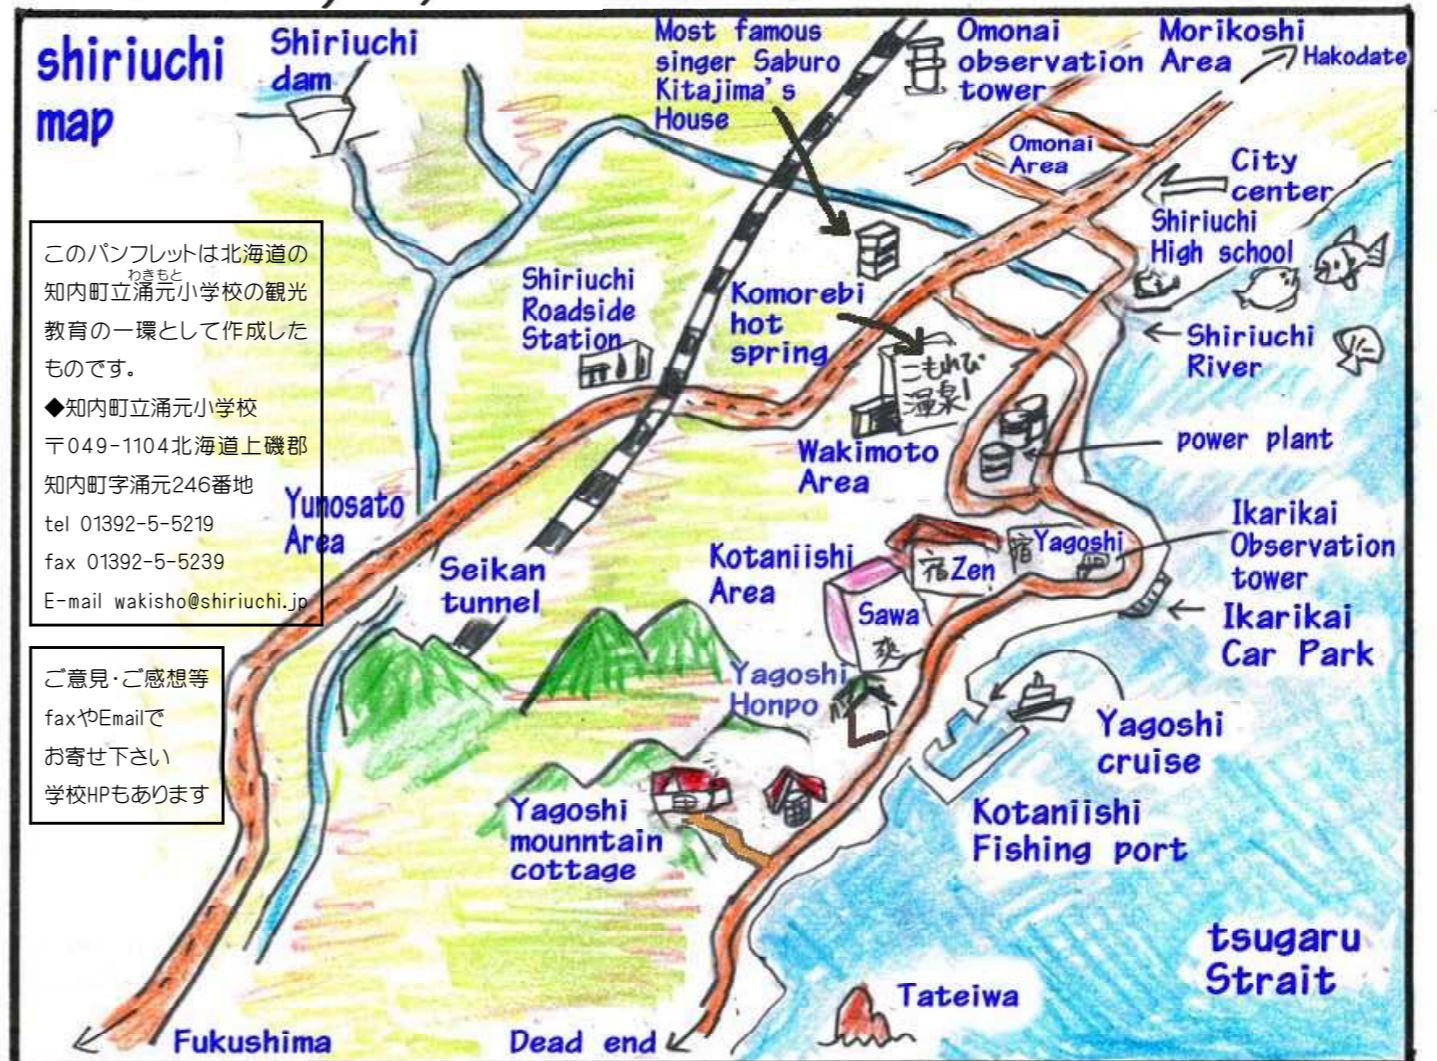

**Kotaniishi Observatory**

A beautiful sound comes out when you ring the happy bell.

Aomori can be seen on sunny days

My recommendation is Ikarikai. You can touch small fish, crabs, sea anemones, hermit crabs and many other living things. Please come in clothes that you can get wet in. (Outdoorsy Y)  
My recommendation is Sawa. Sawa's parfaits melt in the mouth. There are many kinds. The cake is also delicious. The texture is fluffy and the cream is also excellent. (Sweet tooth K)
